Naomi Muthoni Chege

FullStack Web Developer

WORK EXPERIENCE

January 2025 - Present

Freelance Full Stack Web Developer

- I have developed and deployed full stack web applications using Node.js, Angular, React, and SQL Server, delivering tailored solutions for clients.
- Designed responsive and user-friendly interfaces improving user engagement
- Collaborated with clients to gather requirements and deliver projects on time, maintaining a 100% client satisfaction rate.

May 2024 - July 2024

Teach2Give

Attachment & Training

- Gained hands-on experience in full stack web development, focusing on Node.js and Angular
- Contributed to team projects, including debugging and optimizing code for performance.
- Learned Agile development practices and version control using Git

EDUCATION

Chuka University

Computer Science

2021 - 2025

- Expected Graduation: November

SKILLS

Frontend: HTML, CSS, Javascript, Typescript, Angular, Tailwind css

Backend : Node.js, Express.js

CERTIFICATIONS

Certificate Secondary

Certificate Primary

- Relevant coursework: Web Development, Databases, Software Engineering, UI design .

Kahuhia Girls High School

Secondary Education

2017 - 2020

education B+(plus)

ACK St. Paul's Mihuti Academy

Primary Education

2015 - 2016

Education

Databases : Sql Server

DevOps: Azure, Docker

QA/QE : Jest, Cypress, jasmine

MS Word, Ms Access

Ms Excel, Ms PowerPoint

B+

PROJECTS

-

Event Management System

Designed and developed a robust event management platform to streamline event planning and coordination. Key features included user registration, event scheduling, real-time notifications, and attendee management. The system improved efficiency by automating manual processes, ensuring seamless communication, and providing organizers with tools to track event progress and attendance

Angular,Nodejs,Sql Server

-

Campus Resource Booking System

Created an intuitive web-based application to manage and book campus resources such as lecture halls, meeting rooms, and equipment. The system included features like real-time availability tracking, booking approvals, and conflict resolution. It significantly reduced scheduling conflicts, optimized resource utilization, and provided a centralized platform for students and staff to access resources effortlessly

React,Nodejs,Sql Server

-

Shoppie Platform

Developed a full-stack e-commerce website with a focus on user experience and functionality. The platform included a product catalog, shopping cart, user authentication, and secure payment gateway integration. Additional features like product search, filters,

and order tracking were implemented to enhance usability. The project demonstrated my ability to build scalable, secure, and user-centric web applications.
Angular,Nodejs,Sql Server

INTERESTS

Listening to music
Reading Books
Watching movies
